The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date. The NAV shall be computed based on the following formula or such other formula as may be prescribed by SEBI from time to time.

Net Assets = Market or Fair Value of the Scheme's Investments + Receivables + Accrued Income + Other Assets – Accrued Expenses – Payables – Other Liabilities

The Fund shall value its investments according to the valuation norms, as specified in Schedule VIII of the Regulations, or such norms as may be prescribed by SEBI from time to time. The broad Valuation norms are detailed below:

Traded Securities:

- (1) The securities shall be valued at the last quoted closing price on the stock exchange.
- (2) When the securities are traded on more than one recognised stock exchange, the securities shall be valued at the last quoted closing price on the stock exchange where the security is principally traded.
- (3) When on a particular valuation day, a security has not been traded on the Principal stock exchange, the value at which it is traded on another stock exchange may be used.
- (4) When a security (other than debt securities) is not traded on any stock exchange on a particular valuation day, the value at which it was traded on the selected stock exchange, as the case may be, on the earliest previous day may be used provided such date is not more than thirty days prior to valuation date.
- (5) When a debt security (other than Government Securities) is not traded on any stock exchange on any particular valuation day, the value at which it was traded on the principal stock exchange or any other stock exchange, as the case may be, on the earliest previous day may be used provided such date is not more than fifteen days prior to valuation date. When a debt security (other than Government Securities) is purchased by way of private placement, the value at which it was bought may be used for a period of fifteen days beginning from the date of purchase.

Thinly Traded Securities:

Thinly Traded Equity/Equity Related Securities:

- (1) "When trading in an equity/equity related security (such as convertible debentures, equity warrants, etc.) in a month is both less than Rs. 5 lakh and the total volume is less than 50,000 shares, it shall be considered as a thinly traded security and valued accordingly".
- (2) For example, if the volume of trade is 100,000 and value is Rs. 400,000, the share does not qualify as thinly traded. Also if the volume traded is 40,000, but the value of trades is Rs. 600,000, the share does not qualify as thinly traded. In order to determine whether a security is thinly traded or not, the volumes traded in all recognised stock exchanges in India may be taken into account.

Valuation of Non-Traded / Thinly Traded Securities:

Non traded/ thinly traded securities shall be valued "in good faith" by the AMC on the basis of the valuation principles laid down below:

Non-traded / thinly traded equity securities:

Based on the latest available Balance Sheet, net worth shall be calculated as follows:

Net Worth per share = [share capital + reserves (excluding revaluation reserves) – Misc. expenditure and Debit Balance in P&L A/c] Divided by number of Paid up Shares.

Average capitalisation rate (P/E ratio) for the industry based upon either Bombay Stock Exchange Limited (BSE) or National Stock Exchange of India Limited (NSE) data (which should be followed consistently and changes, if any noted with proper justification thereof) shall be taken and discounted by 75% i.e. only 25% of the Industry average P/E shall be taken as capitalisation rate (P/E ratio). Earnings per share of the latest audited annual accounts will be considered for this purpose.

- (1) The value as per the net worth value per share and the capital earning value calculated as above shall be averaged and further discounted by 10% for ill-liquidity so as to arrive at the fair value per share.
- (2) In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalised earning.
- (3) In case where the latest balance sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero.
- (4) In case an individual security accounts for more than 5% of the total assets of the Scheme, an independent valuer shall be appointed for the valuation of the said security.
- (5) To determine if a security accounts for more than 5% of the total assets of the Scheme, it should be valued by the procedure above and the proportion which it bears to the total net assets of the Scheme to which it belongs would be compared on the date of valuation.

Non Traded Securities:

When a security (other than Government Securities) is not traded on any stock exchange for a period of thirty days prior to the valuation date, the scrip must be treated as a 'non traded' security.

Valuation of Unlisted Equity Shares:

Unlisted equity shares of a company shall be valued "in good faith" on the basis of the valuation principles laid down below:

- (1) Based on the latest available audited balance sheet, net worth shall be calculated as lower of (a) and (b) below:
 - (a) Net worth per share = [share capital plus free reserves (excluding revaluation reserves) minus Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses] divided by Number of Paid up Shares.
 - (b) After taking into account the outstanding warrants and options, Net worth per share shall again be calculated and shall be = [share capital plus consideration on exercise of Option/Warrants received/receivable by the Company plus free reserves (excluding revaluation reserves) minus Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses] divided by [Number of Paid up Shares plus Number of Shares that would be obtained on conversion/exercise of Outstanding Warrants and Options]

The lower of (a) and (b) above shall be used for calculation of net worth per share and for further calculation in (3) below.

- (2) Average capitalisation rate (P/E ratio) for the industry based upon either BSE or NSE data (which should be followed consistently and changes, if any, noted with proper justification thereof) shall be taken and discounted by 75% i.e. only 25% of the Industry average P/E shall be taken as capitalisation rate (P/E ratio). Earnings per share of the latest audited annual accounts will be considered for this purpose.
- (3) The value as per the net worth value per share and the capital earning value calculated as above shall be averaged and further discounted by 15% for illiquidity so as to arrive at the fair value per share.

The above methodology for valuation shall be subject to the following conditions:

- (a) All calculations as aforesaid shall be based on audited accounts.
- (b) In case where the latest balance sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero.
- (c) If the net worth of the company is negative, the share would be marked down to zero.
- (d) In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalised earning.
- (e) In case an individual security accounts for more than 5% of the total assets of the Scheme, an independent valuer shall be appointed for the valuation of the said security. To determine if a security accounts for more than 5% of the total assets of the Scheme, it should be valued in accordance with the procedure as mentioned above on the date of valuation.
- (f) At the discretion of the AMC and with the approval of the Trustees, an unlisted equity share may be valued at a price lower than the value derived using the aforesaid methodology.

Thinly Traded Debt Securities:

- (1) A debt security (other than Government Securities) shall be considered as a thinly traded security if on the valuation date, there are no individual trades in that security in marketable lots (currently Rs 5 crore) on the principal stock exchange or any other stock exchange.
- (2) A thinly traded debt security as defined above would be valued as per the norms set for non-traded debt security.

Valuation of Debt & Money Market Instruments:

Valuation of money market and debt securities with residual maturity of upto 91 days:

All money market and debt securities, including floating rate securities, with residual maturity of upto 91 days shall be valued at the weighted average price at which they are traded on the particular valuation day. When such securities are not traded on a particular valuation day they shall be valued on amortization basis. It is further clarified that in case of floating rate securities with floor and caps on coupon rate and residual maturity of upto 91 days then those shall be valued on amortization basis taking the coupon rate as floor.

Valuation of money market and debt securities with residual maturity of over 91 days:

All money market and debt securities, including floating rate securities, with residual maturity of over 91 days shall be valued at weighted average price at which they are traded on the particular valuation day. When such securities are not traded on a particular valuation day they shall be valued at benchmark yield/ matrix of spread over risk free benchmark yield obtained from agency(ies) entrusted for the said purpose by AMFI.

For the purpose of valuation, all Non Traded Debt Securities would be classified into "Investment grade" and "Non Investment grade" securities based

on their credit ratings. The non-investment grade securities would further be classified as "Performing" and "Non Performing" assets (NPA)

- (1) All Non Government investment grade debt securities, classified as not traded, shall be valued on yield to maturity basis as described in the applicable SEBI circular.
- (2) All Non Government non-investment grade performing debt securities would be valued at a discount of 25% to the face value.
- (3) All Non Government non-investment grade non-performing debt securities would be valued based on the provisioning norms. These norms detail the guidelines for identification and provisioning form NPA (Debt Securities) issued by SEBI to Mutual Funds.
- (4) Debt instruments shall generally be valued on a yield to maturity basis, the capitalization factor being determined for comparable traded securities and with an appropriate discount for lower liquidity, promoter background, finance company risk and issuer class risk.

SEBI in its circulars dated Oct 18, 2008, February 20, 2002, September 18, 2002, October 18, 2008 had provided the discretionary mark up and mark down yields. The recent circular dated June 12, 2009 provides as follows and would be implemented within the given timeframe.

Category	Discretionary discount over benchmark yield in basis points
Rated Instruments with duration upto 2 years	Discretionary Discount of upto +100/-50
Rated Instruments with duration over 2 years	Discretionary Discount of upto +75/-25
Unrated Instruments with duration upto 2 years	Discretionary Discount of upto +50 over and above the mandatory Discount of +50
Unrated Instruments with duration over 2 years	Discretionary Discount upto +50 over and above the mandatory Discount of +25

The approach in valuation of non traded debt securities is based on the concept of using spreads over the benchmark rate to arrive at the yields for pricing the non traded security. The Yields for pricing the non traded debt security would be arrived at using the process as defined below.

Step A

A Risk Free Benchmark Yield is built using the Government Securities (GOI Securities) as the base. GOI Securities are used as the benchmarks as they are traded regularly; free of credit risk; and traded across different maturity spectrums every week.

Step B

A Matrix of spreads (based on the credit risk) is built for marking up the benchmark yields. The matrix is built based on traded corporate paper on the wholesale debt segment of an appropriate stock exchange and the primary market issuances. The matrix is restricted only to investment grade corporate paper.

Step C

The yields as calculated above are Marked-up/Marked-down for ill-liquidity risk

Step D

The Yields so arrived are used to price the portfolio while investments in call money, bills purchased under rediscounting Scheme and short term deposits with banks shall be valued at cost plus accrual; other money market instruments shall be valued at the yield at which they are currently traded. For this purpose, non-traded instruments that is, instruments not traded for a period of seven days will be valued at cost plus interest accrued till the beginning of the day plus the difference between the redemption value and the cost spread uniformly over the remaining maturity period of the instruments;

Government securities will be valued at yield to maturity based on the prevailing market rate.

In respect of convertible debentures and bonds, the non-convertible and convertible components shall be valued separately. The non-convertible component should be valued on the same basis as would be applicable to a debt instrument. The convertible component should be valued on the same basis as would be applicable to an equity instrument. If, after conversion the resultant equity instrument would be traded pari passu with an existing instrument which is traded, the value of the latter instrument can be adopted after an appropriate discount for the non-tradability of the instrument during the period preceding the conversion. While valuing such instruments, the fact whether the conversion is optional should also be factored in.

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. A discount similar to the discount to be determined in respect of convertible debentures (as referred to in sub-paragraph (d) above) must be deducted to account for the period that must elapse before the warrant can be exercised.

Where instruments have been bought on 'repo' basis, the instrument must be valued at the resale price after deduction of applicable interest upto date of resale. Where an instrument has been sold on a 'repo' basis, adjustment must be made for the difference between the repurchase price (after deduction of applicable interest upto date of repurchase) and the value of the instrument. If the repurchase price exceeds the value, the depreciation must be provided for and if the repurchase price is lower than the value, credit must be taken for the appreciation.

Valuation of securities not covered under the current valuation policy:

In case of securities purchased by mutual funds do not fall within the current framework of the valuation of securities then such mutual fund shall report immediately to AMFI regarding the same. Further, at the time of investment AMCs shall ensure that the total exposure in such securities does not exceed 5% of the total AUM of the scheme. AMFI has been advised that the valuation agencies should ensure that the valuation of such securities gets covered in the valuation framework within six weeks from the date of receipt of such intimation from mutual fund.

In the interim period, till AMFI makes provisions to cover such securities in the valuation of securities framework, the mutual funds shall value such securities using their proprietary model which has been approved by their independent trustees and the statutory auditors.

Valuation of securities with Put/Call Options

The option embedded securities would be valued as follows:

Securities with call option:

The securities with call option shall be valued at the lower of the value as obtained by valuing the security to final maturity and valuing the security to call option.

In case there are multiple call options, the lowest value obtained by valuing to the various call dates and valuing to the maturity date is to be taken as the value of the instrument.

Securities with Put option:

The securities with put option shall be valued at the higher of the value as obtained by valuing the security to final maturity and valuing the security to put option.

In case there are multiple put options, the highest value obtained by valuing to the various put dates and valuing to the maturity date is to be taken as the value of the instruments.

Securities with both Put and Call option on the same day:

The securities with both Put and Call option on the same day would be deemed to mature on the Put/Call day and would be valued accordingly.

Illiquid Securities:

- (1) Aggregate value of "illiquid securities" of Scheme, which are defined as non-traded, thinly traded and unlisted equity shares, shall not exceed 15% of the total assets of the Scheme and any illiquid securities held above 15% of the total assets shall be assigned zero value.
- (2) All funds shall disclose as on March 31 and September 30 the Scheme-wise total illiquid securities in value and percentage of the net assets while making disclosures of half yearly portfolios to the unitholders. In the list of investments, an asterisk mark shall also be given against all such investments, which are recognised as illiquid securities.
- (3) Mutual Funds shall not be allowed to transfer illiquid securities among their Schemes with effect from October 1, 2000.
- (4) In respect of closed ended funds, for the purposes of valuation of illiquid securities, the limits of 15% and 20% applicable to open-ended funds should be increased to 20% and 25% respectively.

Value of "Rights" entitlement

- (1) Until they are traded, the value of the "rights" entitlement would be calculated as:

$V_r = n/m \times (P_{ex} - P_{of})$ where

V_r = Value of rights

n = no. of rights Offered

m = no. of original shares held

P_{ex} = Ex-Rights price

P_{of} = Rights Offer price

- (2) Where the rights are not traded pari-passu with the existing shares, suitable adjustments would be made to the value of rights. Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights would be valued at the renunciation value.

Expenses and Incomes Accrued

All expenses and incomes accrued up to the valuation date shall be considered for computation of NAV. For this purpose, major expenses like management fees and other periodic expenses would be accrued on a day-to-day basis. The minor expenses and income will be accrued on a periodic basis, provided the non-daily accrual does not affect the NAV calculations by more than 1%.

Changes in securities and in number of units:

Any changes in securities and in the number of units will be recorded in the books not later than the first valuation date following the date of transaction. If this is not possible, given the frequency of NAV disclosure, the recording may be delayed up to a period of seven days following the date of the transaction, provided as a result of such non recording, the NAV calculation shall not be affected by more than 2%.

The valuation guidelines as outlined above are as per prevailing Regulations and are subject to change from time to time in conformity with changes made by SEBI.

Valuation of Derivative Products:

- (1) The traded derivatives shall be valued at market price in conformity with the stipulations of sub clauses (i) to (v) of clause 1 of the Eighth Schedule to the Regulations as amended from time to time.
- (2) The valuation of untraded derivatives shall be done in accordance with the valuation method for untraded investments prescribed in sub clauses (i) and (ii) of clause 2 of the Eighth Schedule to the Regulations as amended from time to time.
- (3) The valuation of the Scheme's assets and calculation of the Scheme's NAV shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

Valuation Norms for Foreign Securities:

On the Valuation Day, the securities issued outside India and listed on the stock exchanges outside India shall be valued at the closing price on the stock exchange at which it is listed or at the last available traded price. However in case a security is listed on more than one stock exchange, the AMC reserves the right to determine the stock exchange, the price of which would be used for the purpose of valuation of that security.

Further in case of extreme volatility in the international markets, the securities listed in those markets may be valued on a fair value basis. For the purpose of valuing all Overseas Investments including American Depository Receipts (ADRs) / Global Depository Receipts (GDRs) listed in Stock Exchange of overseas market, following valuation procedure would be followed:

If the security is listed in a time zone ahead of India than the same days price closing price would be used for valuation. The price in foreign currency would be obtained and based on the closing RBI reference rate, the valuation in Indian rupee would be done. If the price in Indian Rupees (INR) for the security is available then the same would be used for valuation.

If the security is listed in a time zone behind India's, than the previous days price would be used for valuation. The price in foreign currency would be obtained and based on the closing RBI reference rate, Indian rupee equivalent would be obtained. If the INR price for the security is available then the same would be used for valuation.

If the stock is listed in currency for which RBI reference rate is not available, the exchange rates available from Reuters (at 5.00 P.M IST) will be used. In case the direct exchange rates are not available on Reuters, then cross currency rate with USD would be considered and converted as per the INR/USD RBI reference rate.

In case any particular security is not traded on the Valuation Day, the same shall be valued on a fair value basis by the Valuation Committee of the AMC

Guidelines for Identification and Provisioning for Non Performing Assets (Debt Securities) For Mutual Funds:

Definition of a NPA

An 'asset' shall be classified as non performing, if the interest and/or principal amount have not been received or remained outstanding for one quarter from the day such income / installment has fallen due.

Effective date for classification and provisioning of NPAs :

The definition of NPA may be applied after a quarter past due date of the interest. For e.g. if the due date for interest is 30.06.2000, it will be classified as NPA from 01.10.2000.

Treatment of income accrued on the NPA and further accruals

After the expiry of the 1st quarter from the date the income has fallen due, there will be no further interest accrual on the asset i.e. if the due date for interest falls on 30.06.2000 and if the interest is not received, accrual will continue till 30.09.2000 after which there will be no further accrual of income. In short, taking the above example, from the beginning of the 2nd quarter there will be no further accrual on income.

On classification of the asset as NPA from a quarter past due date of interest, all interest accrued and recognized in the books of accounts of the Fund till the date, should be provided for. For e.g if interest income falls due on 30.06.2000, accrual will continue till 30.09.2000 even if the income as on 30.06.2000 has not been received. Further, no accrual will be done from 01.10.2000 onwards. Full provision will also be made for interest accrued and outstanding as on 30.06.2000.

Provision for NPAs – Debt Securities

Both secured and unsecured investments once they are recognized as NPAs call for provisioning in the same manner and where these are related to close ended Scheme the phasing would be such that to ensure full provisioning prior to the closure of the Scheme or the scheduled phasing which ever is earlier.

The value of the asset must be provided in the following manner or earlier at the discretion of the fund. Fund will not have discretion to extend the period of provisioning. The provisioning against the principal amount or instalments should be made at the following rates irrespective of whether the principal is due for repayment or not.

- 10% of the book value of the asset should be provided for after 6 months past due date of interest i.e. 3 months from the date of classification of the asset as NPA.
- 20% of the book value of the asset should be provided for after 9 months past due date of interest i.e 6 months from the date of classification of the asset as NPA.
- Another 20% of the book value of the assets should be provided for after 12 months past due date of interest i.e 9 months from the date of classification of the asset as NPA.
- Another 25% of the book value of the assets should be provided for after 15 months past due date of interest i.e. 12 months from the date of classification of the asset as NPA.
- The balance 25% of the book value of the asset should be provided for after 18 months past due date of the interest i.e 15 months from the date of classification of the assets as NPA.

Book value for the purpose of provisioning for NPAs shall be taken as a value determined as per the prescribed valuation method.

This can be explained by an illustration: Let us consider that interest income is due on a half yearly basis and the due date falls on 30.06.2000 and the interest is not received till 1st quarter after due date i.e. 30.09.2000. This provisioning will be done in following phased manner:

10% provision	01.01.2001	6 months past due date of interest i.e 3 months from the date of classification of asset as NPA (01.10.2000)
20% provision	01.04.2001	
20% provision	01.07.2001	
25% provision	01.10.2001	
25% provision	01.01.2002	

Thus, 1 1/2; years past the due date of income or 1 1/4; year from the date of classification of the 'asset' as an NPA, the 'asset' will be fully provided for. If any installment is fallen due, during the period of interest default, the amount of provision should be installment amount or above provision amount, whichever is higher.

Reclassification of assets:

Upon reclassification of assets as 'performing assets':

- (1) In case a company has fully cleared all the arrears of interest, the interest provisions can be written back in full.
- (2) The asset will be reclassified as performing on clearance of all interest arrears and if the debt is regularly serviced over the next two quarters.
- (3) In case the company has fully cleared all the arrears of interest, the interest not credited on accrual basis would be credited at the time of receipt.
- (4) The provision made for the principal amount can be written back in the following manner: -
 - (a) 100% of the asset provided for in the books will be written back at the end of the 2nd quarter where the provision of principal was made due to the interest defaults only.
 - (b) 50% of the asset provided for in the books will be written back at the end of the 2nd quarter and 25% after every subsequent quarter where both installments and interest were in default earlier.
- (5) An asset is reclassified, as 'standard asset' only when both overdue interest and overdue installments are paid in full and there is satisfactory performance for a subsequent period of 6 months.

Receipt of past dues:

When the fund has received income/principal amount after their classifications as NPAs ;

- (1) For the next 2 quarters, income should be recognized on cash basis and thereafter on accrual basis. The asset will be continued to be classified as NPA for these two quarters.
- (2) During this period of two quarters although the asset is classified as NPA no provision needs to be made for the principal if the same is not due and outstanding
- (3) If part payment is received towards principal, the asset continues to be classified as NPA and provisions are continued as per the norms set at (D) above. Any excess provision will be written back.

Classification of Deep Discount Bonds as NPAs :

Investments in Deep Discount Bonds can be classified as NPAs, if any two of the following conditions are satisfied:

- (1) If the rating of the Bond comes down to grade 'BB' or below.
- (2) If the company is defaulting in their commitments in respect of other assets, if available.
- (3) Full Net worth erosion.
- (4) Provision should be made as per the norms set at (D) above as soon as the asset is classified as NPA.
- (5) Full provision can be made if the rating comes down to grade 'D'

Reschedulement of an asset :

In case any company defaults either interest or principal amount and the fund has accepted a reschedulement of the schedule of payments, then the following practice may be adhered to :

- (1) In case it is a first reschedulement and only interest is in default, the status of the asset namely, 'NPA' may be continued and existing provisions should not be written back. This practice should be continued for two quarters of regular servicing of the debt. Thereafter, this be classified as 'performing asset' and the interest provided may be written back.
- (2) If the reschedulement is done due to default in interest and principal amount, the asset should be continued as non performing for a period of 4 quarters, even though the asset is continued to be serviced during these 4 quarters regularly. Thereafter, this can be classified as 'performing asset' and all the interest provided till such date should be written back.
- (3) If the reschedulement is done for a second/third time or thereafter, the characteristic of NPA should be continued for eight quarters of regular servicing of the debt. The provision should be written back only after it is reclassified as 'performing asset'.

Disclosure in the Half Yearly Portfolio Reports:

The mutual funds shall make scripwise disclosures of NPAs on half yearly basis along with the half yearly portfolio disclosure.

The total amount of provisions made against the NPAs shall be disclosed in addition to the total quantum of NPAs and their proportion of the assets of the mutual fund Scheme. In the list of investments an asterisk mark shall be given against such investments which are recognized as NPAs. Where the date of redemption of an investment has lapsed, the amount not redeemed shall be shown as 'Sundry Debtors' and not investment provided that where an investment is redeemable by instalments, that will be shown as an investment until all instalments have become overdue.

Effective date for implementation / switchover to the current norms :

The above norms shall be implemented by all mutual funds including UTI from 01.10.2000.

Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund:

Provided further that where the gold held by a gold exchange traded fund Scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

- (3) If the gold acquired by the gold exchange traded fund Scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of sub-paragraph (1).

(1) Prevention of Money Laundering Act Requirements (PML Requirements)

In terms of the PML Requirements, all intermediaries, including Mutual Funds, have to formulate and implement a Client Identification Process, commonly referred to as KYC Process, verify and maintain the record of identity and address (es) of investors. RMF recognizes the value and importance of creating a business environment that strongly discourages money launderers from using RMF.

The investor(s) / unitholder(s) including guardian(s) where investor / unitholder is a minor, must ensure that the amount invested in the Scheme is derived only through legitimate sources and does not involve and is not designed for the purpose of any contravention or evasion of the provisions of all the applicable laws, rules and regulations, directions issued by the appropriate authority (the applicable laws) in force from time to time including the Prevention of Money Laundering Act, the Income Tax Act, 1961, or the Prevention of Corruption Act, 1988, etc.

Pursuant to the above and SEBI in terms of circulars – MIRSD/SE/Cir-21/2011 dated October 05, 2011, MIRSD/Cir-23/2011 dated December 02, 2011 and MIRSD/Cir-26/2011 dated December 23, 2011, the AMC has adopted certain policies to ensure KYC, PML and SEBI Requirements, considered appropriate for its line of business, being committed to prevent money launderers using RMF as a vehicle for any such illegal activity. Accordingly, RCAM may seek information or obtain and retain documentation used to establish Customers' identity. It may re-verify identity and obtain any missing or additional information for this purpose.

RMF / RCTC / RCAM reserve the right to take all steps and actions, including recording investor(s) / unitholder(s) telephonic calls, and / or obtain and retain documentation for establishing the identity of the investor, proof of residence, source of funds etc. in accordance with the applicable laws, from the investor(s) / unitholder(s), as may be required, to ensure the appropriate identification / verification / re-verification of the investor(s) / unitholder(s), the source of funds etc. under its KYC Policy.

The AMC, under powers delegated by the Trustees, shall have absolute discretion to reject any application, prevent further transactions by a Unit Holder, delay processing redemption as per applicable laws or regulations if:

- (i) after due diligence, the investor / Unit Holder / a person making the payment on behalf of the investor does not fulfill the requirements of the KYC as determined by the AMC or the AMC believes that the transaction is suspicious in nature as regards money laundering.
- (ii) the AMC determines in its sole discretion that the application does not or will not comply with any applicable laws or regulations.

In this regard the AMC reserves the right to reject any application and affect a mandatory Redemption of Units allotted at any time prior to the expiry of 30 days from the date of the allotment.

If the payment for Purchase of Units are made by a third party (e.g. a power of attorney holder, a financing agency, a relative, etc.), the investor / applicant may be required to give such details of such transaction so as to satisfy the AMC of the source and / or consideration underlying the transaction.

(i) Requirement for the existing investors in mutual funds (upto December 31, 2011):

Unless the IPV process is completed, the intermediary will not be able to process the KYC and obtain a temporary acknowledgement for submission of all the documents. Hence the investor will not be considered as KYC compliant under the new KYC compliance procedure and hence will not be permitted to make any investment in the Fund;
- Once all the documents are verified by a KRA, they will send the investor a letter within 10 working days from the date of receipt of necessary documents by them from the Fund or its Registrar and Transfer Agent informing the investor either about compliance by the investor of the new KYC compliance procedure ("**final acknowledgement**") or any deficiency in submission of details or documents.
